

Digital Eyewitness® **ION and ION Eclipse**

Digital Eyewitness® **ION and ION Eclipse**

Playable DVD Media Options

Kustom Signals has added a new media option to the Digital Eyewitness *ION* and *ION Eclipse* in-car video systems. Now recordings can be made on DVD+R discs that play on regular DVD players!

Easy to Use

DVD+R discs are as easy to manage as VHS tapes and can be easily viewed in your office or in court using a regular DVD player connected to a TV.

Cost Effective

DVD+R discs are inexpensive and play on very affordable regular DVD players. This system eliminates the need to purchase a computer database management system and also eliminates the IT resources needed to maintain that database.

Integrity of Evidence

DVD+R is a "write-once" format. After the files are burned to a disc, they cannot be erased or altered. You can easily refute a false accusation of erasing or tampering with a file.

Fast, Reliable Burning

Our DVD+R system uses the fastest (16X) and most reliable burning method available. Files may be burned by accessing a menu. If files are available for burning, the system will notify the user each time the system is powered down.

Quality Video

All files are recorded using 720 x 480 resolution/frame size to provide excellent video quality. Three record settings (good/better/best) are included to allow you to select the setting that works best for you.

File Protection/Integrity

Once burned to the DVD+R disc, files are also archived on an internal hard drive for subsequent retrieval if needed. All files include an industry standard check to verify authenticity.

Unmatched Service and Support

Kustom Signals has over 40 years of experience serving law enforcement. We provide unequalled service and support before and after the sale through: professional sales teams, consisting of both inside and field sales representatives; factory service technicians; field service technicians; field application engineers; authorized service centers and Police Installers.

Kustom Signals has the experience and the products to be your Total Digital Video Solution Provider!
