

WIRELESS SPEED SENSE MODULE

BRING YOUR RADAR TO THE FUTURE

With an increasing number of vehicles removing easy access to Vehicle Speed Sensing (VSS), the Wireless VSS Module from Kustom Signals makes it possible to continue using your fleet's RADAR of choice.

FUTUREPROOF YOUR FLEET

Add Kustom Signals patented TruTrak features to your Eagle II, Falcon HR, Raptor RP-1, or Directional Talon.

- Quickly display patrol and target speeds when exiting HOLD
- Enables Automatic Mode Switching
- Eliminates RADAR anomalies like Shadowing, Batching, and Combining

EASY INSTALLATION

- Uses two simple cables, making installation quicker and easier than traditional in-car RADAR
- Also perfect for motorcycle fleets due to its small size
